

Friday 8th October 2071. Dandelion

Takes

The brightness of the sun &
the changes of seasons unheeded
for its first stage in light.

Takes

The reflection of the moon light &
the deepness of the gleaming ocean and the coral reefs
for its second stage moonlight.

Takes

The midnight glimmer and the sunlight and
the softness of a dove's tail
for its third stage sunrise.

Takes

An old man's beard and a smooth orange pulse
the softness of a rabbit's face for the roots.

Takes

The greenness of the high grass &
the openness of a snowy drift and a hidden tunnel.
